

For Immediate Release on December 3, 2020

**TOWN OF TRURO CONTINUING EFFORTS ON URBAN DEER
MANAGEMENT**

Council would like to let the public know that work is continuing with respect to a possible deer management strategy for the Town.

Staff are currently working with the NS Department of Lands and Forestry on a briefing for Council to provide an overview of the situation. During the briefing Council will have the opportunity to ask Lands and Forestry officials specific questions on options, and seek recommendations on moving forward.

The information from the recent plebiscite along with data gathered over the last three years, including the survey information from the 2017 on-line survey will be discussed.

While a final decision will not be made during this meeting, it will be the preliminary step in informing Council for a final decision at an upcoming public meeting.
